

Turboconsultant.

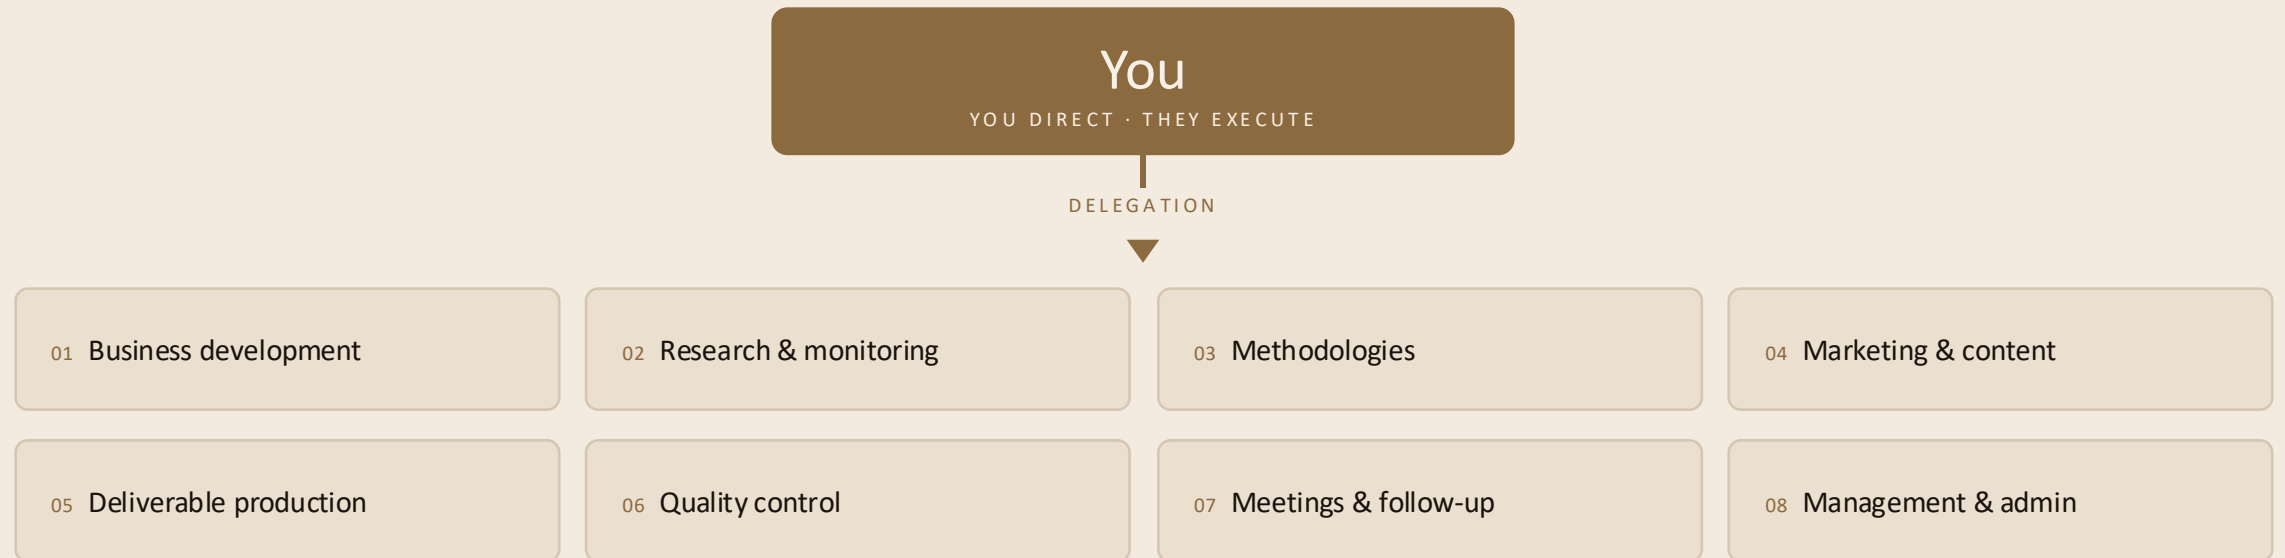

27 July 2026

The execution layer for solo-consultants

Jean-Christophe Lanoix, Founder

jcl@turboconsultant.com

A virtual team of agents, *under your direction*

Turboconsultant turns Claude Cowork into *consulting-grade AI*

You

Direct the team of AI agents · set the standard · do the human review · keep the final call.

Turboconsultant

Orchestrates Cowork's agents into a consulting team · brings the consulting craft & the guardrails AI needs · installs as a plugin · no contact surface with your data.

Anthropic · Claude
Cowork

Enterprise-grade agentic workspace · security, compliance, model updates · runs under your own subscription. Generalist, non-consulting grade orchestration layer.

Anthropic's LLMs
(Fable 5, Opus 4.8, Sonnet 5...)

Frontier models. Raw power, no capacity to act on its own, and no guardrails.

You inherit Anthropic's certified infrastructure — Turboconsultant brings the métier.

Consumer AI isn't built for the demands of *consulting*

THE LIMITS OF CONSUMER AI

Generic output, no differentiation

A yes-man that rubber-stamps everything

Hallucinations, made-up facts, errors

Information leaking between clients

A patchwork of disconnected tools, no capitalization

THE TURBOCONSULTANT SAFEGUARDS

Personalization — your voice, frameworks and templates (via one-time 2h onboarding session)

Critical thinking — it challenges you, like a real senior partner

Triple quality control on every claim and figure (source traceability, internal & external audits)

Strict walling-off — no data moves from one client to another. Impossible by design.

One unified, personalized system, that works like you and sharpens with every engagement

The model *never trains* on your clients' data

Claude Cowork

ROLE

Your workspace (Anthropic)

MODEL TRAINING

Excluded —

*Via opt-out in Cowork settings (Pro plan)
Or Anthropic contractual commitment (Team/Ent. plans)*

RETENTION

≤ 30 days (for security), then deleted

Anthropic API

ROLE

External audit

MODEL TRAINING

Excluded — by default

RETENTION

≤ 30 days (for security), then deleted

OpenAI API

ROLE

External audit

MODEL TRAINING

Excluded — by default

RETENTION

≤ 30 days (for security), then deleted

Turboconsultant stores and processes no user data. US storage + EU standard contractual clauses · SOC 2 Type 2, ISO 27001/17/18/701, CSA STAR · the consultant's judgment stays the ultimate guardrail.

A library of *150+ methodologies*

150+

consulting methodologies, ready to run

- **Completed by your own in-house methodologies** collected during the onboarding
- **Matched and customized automatically** to the engagement you're on
- **Personalized** to your practice, your standards, your voice
- **A living library** that keeps growing — not a static PDF

150+ frameworks across *24 categories*

On the roadmap, *shipping soon*

IN BUILD NOW

Mechanistic number QA

Every figure in a deliverable auto-checked against its source — no more silent errors slipping through.

Deterministic (non LLM-based QA)

NEXT

Automatic anonymization

Sensitive information (names, phone numbers...) stripped before the model, restored in the answer — zero action from you, the model never sees confidential data.

ONGOING

More methodologies

New sectors and deliverable types added to your library, continuously.

What consultants say about *Turboconsultant*

“An RFP? I upload the brief, give it my context and my strategy, and in minutes Turboconsultant produces a sharp PowerPoint that plays to my strengths.”

 [Philippe Samat](#)

PSa Consult

“Every conclusion is cross-checked against its sources: nothing is fabricated, everything holds up. That's what gives Turboconsultant its credibility.”

 [Jean-Marc Tixhon](#)

Senior advisor

“Turboconsultant gives me a consultant, not an intern. The AI's basic errors disappear, I stay the architect, and I multiply my productivity by a factor of 25.”

 [Wouter Vanhoudt](#)

Former partner, Hinicio

[SEE THE CASE STUDY →](#)

“After a couple of hours teaching it my style and methodologies, Turboconsultant built a client proposal that needed almost no iterations. What impressed me was the auditing: it flagged things in my own deliverable that I'd read without noticing.”

 [Ana Milena](#)

12 years in consulting

Two ways to *start*

ALREADY CONVINCED?

Turboconsultant

Your AI agents, built for your practice — turnkey.

- One-click install
- Personalized onboarding, guided over a video call
- Your voice, frameworks, templates — your data walled off
